PROFESSIONAL SUMMARY

Entry-level **software developer** (B.Tech CSE, 2026) who builds and tests data-driven applications in **Python, SQL and Java**. Built a Flask resume-matching tool with **scikit-learn**, a MySQL library system with **stored procedures and triggers**, and a retail sales analysis using **CTEs and window functions**. Writes **end-to-end tests in Playwright and Cypress** (TypeScript), runs them in **GitHub Actions** and tracks bugs in **Jira**. Looking for a software developer, backend or test automation role.

SKILLS

Languages: Python, SQL, Java, JavaScript, TypeScript (tests)
Backend & APIs: Flask, Spring Boot, REST APIs, JDBC
Databases: MySQL, SQLite, Database Design, Stored Procedures, Triggers, CTEs, Window Functions
Data & ML: scikit-learn, Pandas, NLP basics (TF-IDF, cosine similarity)
Testing: Playwright, Cypress, pytest, End-to-End Testing, Bug Reporting (Jira)
Tools: Git, GitHub, GitHub Actions, Docker, VS Code, Jupyter Notebook
Frontend: HTML, CSS, JavaScript

PROJECTS

AI Resume–Job Match Scorer | Python, Flask, scikit-learn, pdfplumber, Playwright

- Built a Flask web app that scores a resume against a job description: 60% skill coverage from a curated list of ~100 skills and their spellings, 40% text similarity with scikit-learn.
- Reports missing skills, important job terms the resume never mentions and what to fix first; parses PDF resumes safely with pdfplumber.
- Covered by 21 unit and API tests plus Playwright end-to-end tests on desktop and mobile, run in GitHub Actions; ships as a Docker image.

Library Management Database | MySQL, Stored Procedures, Triggers, Views, Python

- Designed a 3NF MySQL database for a college library where stored procedures handle lending and returns and triggers update copy status and late fines automatically.
- Replayed 15 months of history (2,200+ loans) through the procedures and added views for availability, overdue books and member summaries; 15 automated tests run on MySQL 8 in CI.

Retail Sales SQL Analysis | MySQL, SQL (CTEs, Window Functions), Python, GitHub Actions

- Designed a MySQL star schema (one fact table, four dimensions) for a 12-store retail chain and loaded two years of sales (38,000+ order lines).
- Answered 20 business questions with joins, CTEs and window functions (RANK, LAG, NTILE, moving averages), including cohort retention and RFM segmentation.
- Found that discounts of 20% or more made electronics and grocery unprofitable and that 26% of customers drove 54% of revenue; the pipeline runs on MySQL 8 in GitHub Actions.

Servisto | Python, Flask, HTML, CSS, JavaScript, SQLite

- Built a Flask and SQLite service-provider marketplace with role-based authentication, service search, bookings with status tracking and provider ratings.

CERTIFICATIONS & TRAINING

Google AI-ML Virtual Internship, AICTE-Eduskill: Built foundational machine learning models with TensorFlow and Google Cloud.

IBM Data Analytics Fluency Pathway: Data preparation, visualization, statistics and analysis.

Google Android Developer Virtual Internship, AICTE-Eduskill: Developed Android apps covering UI design, backend integration, APIs and the app lifecycle.

EDUCATION

B.Tech, Computer Science & Engineering | Ajeenkya D Y Patil University, Pune | 2022–2026 | CGPA 7.92

Class XII | Dnyandeep English Medium School & Junior College, Sangli | 2022 | 78%

Class X | Smt. R. N. Patil Girls High School & Jr. College, Sangli | 2020 | 92.4%
